

## Chapter 11: Drones as a Security Solution

Recommended Actions   Discussion	LCOs	Investors / BoD	Municipalities
Consider an internal analysis, discovery process, or obtaining third party proposals regarding the features, benefits and cost savings associated with implementing drones based upon your specific objectives and use cases	X	X	X
Utilize the list (checklist) of experiences, qualifications and capabilities to screen third party solutions providers provided in <i>Chapter 20: Moving Forward - LCOs</i> if you consider engaging with a third party	X	X	X
Reference the list (checklist) of drone specific capabilities in this Chapter to screen third party solutions providers to help you achieve your drone solution objectives	X	X	X
Municipalities need to consider the added cost savings (and other features and benefits) of deploying cost-effective, cluster-based, drone security solutions in support of LCOs operating in high risk Green Zones			X
Municipalities also need to consider mandating the implementation, training and auditing of compliance with various Standard Operating Procedures (SOPs) associated with a drone security solution that includes local law enforcement; this will streamline public comment and approval processes; SOPs related to managing, operating and administering drones to also include mandated topics (e.g., ethical drone usage, privacy, data protection, other)			X
